Welcome

On behalf of the School of Mathematics and Statistics, I'm pleased to welcome you as a user of the Research Area in the School building.

The School of Mathematics and Statistics was created in 1991 as a shared project of the Departments of Mathematics and Statistics of the Technical University of Catalonia, with the aim of building a quality training centre which profits from the technological environment in which it is involved.

It is a satisfaction for all of us to be able to contribute to the support to research and transfer of knowledge, activities which have been consolidating more and more in the set of training goals of our School. We strongly believe that the interaction between students of all levels and senior researchers positively contributes to complete the training of our students, and this interaction will be positive for our visitors, as well.

In this brochure you will find the basic information to access to the services offered by the School, the University and our close surroundings. You can turn to the secretariat of the Mathematical Research Office for any further explanation or help.

I wish you have a nice stay among us both in the scientific and in the human side. To this purpose we offer you the resources of our School and our warmest welcome.

Jordi Quer Bosor

Dean of the School of Mathematics and Statistics
